Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The references listed in the Information Disclosure Statement filed on December 22, 2004 has been considered by the examiner (see attached PTO-326 form).

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawing Objections

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "20" has been used to designate both flap, region, and triangular area (Detailed Description page 10 lines 30-32, 39-40) and reference character "10" has been used to designate both apparatus and label (Detailed Description page 10 lines 13-14). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be

Art Unit: 1709

notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 3 stating "or the like" is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-15, 17-18, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Mizuno (U.S. Patent 5,989,608; hereinafter Mizuno).

Regarding claims 1 and 8, Mizuno discloses a member and pressure relief valve which wraps around a dish format container with a release material on one face and a label layer carrying an adhesive on an opposite face (Figure 5 #24, Description of the

Art Unit: 1709

Embodiments column 5 lines 30-31) and a region of discontinuity in the label layer

(Figure 6 #16, Description of the Embodiments column 4 lines 45-46).

FIG. 5

8. Regarding claims 2-4 and 9-11, Mizuno discloses a region of discontinuity in the form of a "single shaped" (as claimed) or two converging cuts which penetrates the label layer (Figure 6 #16, Description of the Embodiments column 4 lines 45-46).

FIG. 6

9. Regarding claim 5-7 and 12-14, Mizuno discloses a region of discontinuity in the form of a single shaped cut which penetrates the label layer (Figure 6 #16, Description of the Embodiments column 4 lines 45-46).

10. Regarding claim 15 and 20, Mizuno discloses a pressure relief valve with a sealant arrangement for the container (Figure 5 #20, Summary of the Invention column 3 lines 28-30).

Art Unit: 1709

11. Regarding claims 17-18, Mizuno discloses a method of placing sealant film over the container, making a hole in the sealant film, having a flap over the aperture, where the product vents through the flap that acts as a valve and a dishlike container to retain the product (Figure 5, Summary of the Invention column 1 lines 52-62).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suraj Chivukula whose telephone number is (571) 270-3471. The examiner can normally be reached on M-F 7:30am-5:00pm EST (1st Friday off).
